

The greening of social, cooperative and public housing activities requires coordination between actors involved at different points in the planning, financing, construction, management and use phases of buildings. This coordination will improve the effectiveness of the building chain in delivering future-proof housing.

NATIONAL PLATFORMS

POWER HOUSE PLATFORMS in participating countries have been established by housing federations to facilitate and boost this coordination. They are also working to put efficiency on the national, regional and local political agendas to achieve adapted legislation and mobilisation of private and public finance.

The platforms are also the central contact points for exchange of know-how and experiences within and across borders.

THE BIG GREEN HOUSING EXCHANGE

POWER HOUSE EUROPE is a web portal created to allow social, cooperative and public housing providers to share their know-how and experiences on energy saving and sustainable housing.

POWER HOUSE EUROPE goes beyond national boundaries and explores case studies from a potential 39.000 housing providers that manage a total of 25 million homes and are affiliated to the European network – CECODHAS-Housing Europe.

POWER HOUSE EUROPE is a useful resource for all those who think that the reduction of energy consumption in buildings is both a necessity and an opportunity, as well as an exciting challenge.

THE BIG GREEN HOUSING EXCHANGE

STAY IN THE LOOP ►

access news and events to ensure you are up to date on all the news from the European Union.

SHARE EXPERIENCES ►

an easy to navigate database of programmes and construction projects with innovative features: choose the topic that interests you, and instantly access the best experiences in Europe.

SHARE KNOWLEDGE ►

a powerful forum to comment and discuss with others. You can propose a new topic for discussion or request more information concerning a published case study: Power House Europe will help you get in touch with the right person.

MAKE CONTACT ►

You may also use the forum to establish learning or project partnerships or arrange study visits with your counterparts around the EU.

REGISTER to fully use all the features of the site. Registration is easy, free of charge and requires only a valid email address.

KNOW HOW TO DO IT ►

a data base containing the most interesting tools developed over 10 years of projects promoted and co-financed by European Union in the field of energy saving, renewable energies and sustainable housing.
